FULL STACK SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

Bilingual (English/Spanish) **full stack software engineer** with **7+ years** building and shipping production web applications across **FinTech** and **SaaS**. Specializes in **Angular**, **TypeScript**, **C#**, and **.NET WebAPI**, with working depth in **React** and solid experience in **SQL**. Leads features end to end for lending, payments, and identity verification products in regulated financial workflows. Recently cut mobile page weight up to **60%** and blocking time up to **62%** across our consumer sites by fixing a third party script problem.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Angular, React, C#, ASP.NET (Core MVC, Web Forms), HTMX, HTML, CSS, jQuery

Back End & APIs: .NET Core, WebAPI, Node.js, Express, SQL Server, PostgreSQL, T SQL, REST, WebSockets

UI/UX Development: Responsive UI, Accessibility (WCAG), cross browser compatibility, Tailwind CSS, Material UI, Bootstrap

Tools & Collaboration: Git, GitHub, Bitbucket, Postman, Jira, Confluence, Agile/Scrum

Integrations: Jumio identity verification, Zions Bank real time payments, Kelley Blue Book API, banking partner APIs

AI Assisted Development: Claude, ChatGPT, Cursor, used daily for development, debugging, and code review

PROFESSIONAL EXPERIENCE

Softwise **Lehi, UT**

Software Engineer *Mar 2021 – Present*

Own end to end delivery of **FinTech** web application features in **Angular**, **ASP.NET**, **C#**, and **.NET WebAPI**.

- **Page performance:** Cut mobile page weight up to **60%** and blocking time up to **62%** across our lending site and member portal by moving a third party chat SDK to **click to load** through **Google Tag Manager**.
- **Lead funnel:** Built the lead application pages for a funnel converting **purchased leads** into loan applications, with **prefill**, consent capture, an **anti bot honeypot**, and an identity check fallback; shipped a **hotfix** for an address gap that sent **~13%** of leads to manual review instead of **auto decisioning**.
- **Identity verification:** Owned the **Jumio** front end integration and routing logic: fixed a timeout hitting **~22%** of first time applicants, added **risk based routing** across **5 tiers** configurable by state without code changes, and automated ID review.
- **Instant funding:** Built the customer facing **real time payments** flow with **Zions Bank** across **5 loan and bank edit flows**, including a progress modal that waits for bank confirmation and **falls back to ACH** if a payment fails.
- **Customer dashboard:** Built **~70%** of the redesigned customer dashboard (**32 of 45** tickets), including **9 dashboard cards**, plus the profile redesign and bank account editing with **step up identity verification**.
- **Production support:** Resolved **~190 production bugs** using **Raygun**, including a TypeError behind **~60%** of a lending app's errors (~1,300 in 13 weeks), now at **zero** for 9+ weeks.
- **MVC migration:** Authored architecture decisions for **HTMX** standards and **Tailwind v4** adoption in a Web Forms to **ASP.NET Core MVC** migration, removing **~83,000 lines** of vendored front end code and **~90 KB** of jQuery.

BrightBridge Web **Provo, UT**

Software Engineer *Jan 2019 – Mar 2021*

- Delivered **full stack SaaS platforms** for client engagements using **React**, **Node.js**, **Express**, and **PostgreSQL**, owning features from requirements through production launch.
- Built the **complete backend API** for a note taking application on **Node.js** and **Express**, using **WebSockets** for **real time sync** so a customer's session updated instantly on every device with the app open.
- Built the app's **rich text (WYSIWYG) editor** with the **TinyMCE React** library.

CERTIFICATIONS

ITIL® 4 Foundation, PeopleCert — Oct 2025

CompTIA Project+, CompTIA — Jun 2025

Certified Scrum Product Owner (CSPO), Scrum Alliance — Oct 2024

AWS Certified Cloud Practitioner, Amazon Web Services — Sep 2024

EDUCATION

Western Governors University, B.S. Software Engineering — May 2023 – Aug 2026

DevMountain, Full Stack Web Development Bootcamp — Apr 2018 – Aug 2018
